

# Notice of Study Commencement

## Replacement of the Greatrix Bridge Schedule B - Municipal Class Environmental Assessment

The Municipality of Tweed is undertaking a study to determine the most suitable alternative to replace the Municipality's Greatrix Bridge due to deteriorating condition. The Greatrix Bridge is located on Robinson Road North in the Municipality. Refer to the inset below for location.

Alternatives for replacement of the bridge include the consideration of different types of water crossing structures, and the widening of the existing road from a single lane to two lanes for enhanced vehicular and pedestrian traffic safety.

### How Might This Project Impact Me?

The study is being undertaken in accordance with a Schedule B Undertaking of the Municipal Class Environmental Assessment (MCEA, 2015), as amended.

The study will consider and assess replacement alternatives, and the associated potential for impacts on the study area's environment from each alternative studied. Upon careful consideration of the potential impacts, a determination of a preferred alternative will be made inclusive of input from agencies, the public, Indigenous Communities, and other interested parties.

### How Can I Get More Information?

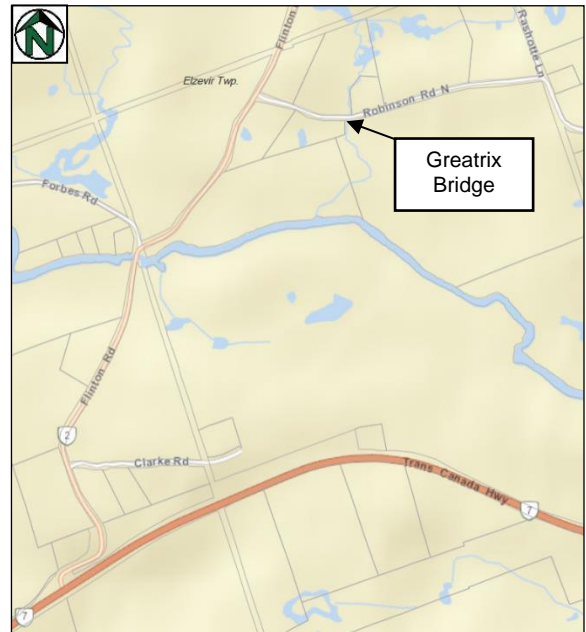

The Municipality's website will maintain current information about the study, at [www.tweed.ca](http://www.tweed.ca). Alternatively, please contact the individuals below for any additional information. Further consultation in the study will occur in the spring/summer of 2020, as the study progresses, and to ensure there is sufficient opportunity for external comments to be received and considered prior to the determination of the preferred alternative.
